PAR 212

24 Dec 64

SUBJECT: Color Acquisition System Review Study

TASK/PROBLEM

1. Investigate color photography as a possible anticipated intelligence medium. Investigation should cover the capability of present and possible future acquisition systems in an attempt to predict future requirements to support exploitation and data reduction of the collected color photographic intelligence material.

DISCUSSION

2. During the period, limited effort was expended. Briefing Aid proposals were the only items of significance, and these were reviewed for submission in rough draft form.

PLANNED ACTIVITIES

3. Effort will be continued to complete Briefing Aid proposals.  
4. Preparation of an interim report is under consideration pending an assessment of possibilities for further progress on this project. Such possibilities would hinge upon another successful high altitude acquisition.
